

I think the FCC should reject the NAB'S petition 01-160 and support XM's right to provide their customers with weather and traffic programs. I get such good programming without the commercials and I enjoy having my satellite radio. To me all the XM is doing the same thing as the Weather Channel except not having commercials every ten minutes. So please reject this bill and put a stop to them trying to pull the plug on XM Satellite Radio or they should stop all the channels that show or broadcast the weather and traffic programs.
